**The Influence of Factors on the Sustainability of Consumer Cooperation from the Perspective of Industry 4.0, 5.0. P. 3.**

This article presents the results of a study on the relationship between Industry 4.0, 5.0 and consumer cooperation sustainability practices. Through the use of structural equation modeling, the study confirms or clarifies existing theories in the field of Industry 4.0, 5.0, sustainable consumer cooperation practices, efficiency and risk management. It offers empirical evidence to support, modify, or extend existing theoretical constructs in the field, contributing to the development of these theories.

**Keywords:** consumer cooperation, Industry 4.0, 5.0, sustainability, sustainable development.

**Improving the Public-Private Partnership Mechanism to Promote the Implementation of Investment Projects in the Region. P. 12.**

The study analyzes state support programs for investment activities in the Novosibirsk region for the period 2022-2023 and assesses their effectiveness in terms of increasing the investment attractiveness of the region. An important area for improving support for investment activity in the Novosibirsk region, according to the authors, is a set of measures of regional investment policy in the field of public-private partnership. The authors propose specific measures to improve the mechanism of public-private partnerships in the Novosibirsk region based on studying the most successful practices of other regions of Russia. The object of the study is state investment policy at the regional level. The subject of the study is public-private partnership as an important area of the state program to attract investment to the Novosibirsk region. The goal of the work is to develop measures to improve the mechanism of public-private partnership in the Novosibirsk region in order to develop and support investment activities in the region.

**Keywords:** investment policy, investments, investment climate, mechanism, government support, entrepreneurship, public-private partnership.

**Cooperatives in the Implementation of Sustainable Development Goals. P. 22.**

The article analyzes the role of cooperatives in achieving the Sustainable Development Goals (SDGs). The relevance of the concept of sustainability is currently enhanced by the pandemic crisis, the negative consequences of climate change, the disruption of economic relationships between countries and the aggravation of the political situation. According to the Development Review Report 2023: Special Edition, progress in implementing the SDGs is insufficient across most of the goals and targets set by the United Nations (UN) for implementation by 2023. Cooperatives with sustainability as a strategic pillar play an important role in addressing issues of poverty, hunger, health, climate change, peace, justice and strong institutions. They mobilize self-help mechanisms to ensure the protection and empowerment of their members, fair income and the well-being of society. Particular attention in their activities is paid to knowledge, education, technology, communications and motivation to achieve sustainability and remain competitive. There are strong links between different types of cooperatives and the SDGs, as evidenced by numerous examples. Cooperative organizations are considered by the UN as partners to accelerate development, but their assistance in achieving the SDGs is limited by barriers to cooperation, management, financing, and effective interaction with government agencies that need to be overcome.

**Keywords:** Sustainable Development Goals, cooperatives, cooperative principles and values, relationship between types of cooperatives and SDGs.

#### **Statistical Analysis of the Sales Volume of Chicken Products by an Organization. P. 36.**

In the article, the authors consider the dynamics of the organization's revenue from the sale of chicken meat. The authors identify seasonal and trend components, calculate statistical indicators, analyze the relationship between the number of receipts, the size of the average receipt, the size of the advertising budget, the average daily temperature, the average price for the entire product range and the demand for chicken meat.

**Keywords:** revenue volume, sales, demand for products, seasonal fluctuations, identified dependencies.

#### **Development of the Market of Animal Insurance Services. P. 48.**

The article examines the historical aspects of insurance development in Russia and highlights the stages of development of insurance for domestic and farm animals. The author studies the structure of farm animal insurance services offered, identifies the problems of the development of the animal insurance market, namely, many congenital problems, which negatively affect the high frequency of the risk of "disease" and high insurance rates. The paper provides some solutions to the problems hindering the development of domestic animal insurance market.

**Keywords:** insurance, domestic animal insurance, farm animal insurance, compulsory insurance, voluntary insurance, insurance company services.

#### **The Impact of Western Sanctions on Stock Exchange Quotes of Shares of Systemically Important Russian Banks. P. 58.**

As part of this study, the impact of sanctions imposed by the United States and the European Union against leading Russian banks on their stock prices is assessed. As a result of the analysis of the stock quotations of the largest banks before and after the imposition of sanctions, conclusions are drawn about the nature of the dynamics of stock prices, about the factors and prospects for their further growth. The methodological aspect of the study is that the banking sector, being the central link of the national financial system, must have reliable ways to assess the current and future state in order to more effectively withstand macroeconomic and geopolitical shocks. Such an assessment should be multidimensional and meaningful, and the methods should also be variable. This work expresses the authors' private approach to assessing some of the negative factors affecting the largest banks in Russia - both directly and indirectly, in modern conditions of financial market development.

**Keywords:** Western shares, sanctions pressure, factors of influence, bank shares, stock quotes, bank capitalization, financial market.
